

• **NTools HSK**
Welding and cutting tip for Hot Stapler Set

NTools HSK is a special welding and cutting tip designed to work with a Hot Stapler device. The tip is equipped with a flexible blade which can be easily and freely formed in accordance with operator's needs. The HSK tip can be used to weld a place where a staple was previously blended or to embed aluminium mesh reinforcing the repair area. Thanks to its low blade thickness (0.5 mm) you can use it to melt or cut any type of plastic. This provides great flexibility in terms of use, i.e. cutting thin tubes, cutting transport belts, cutting small plastic pieces to size.

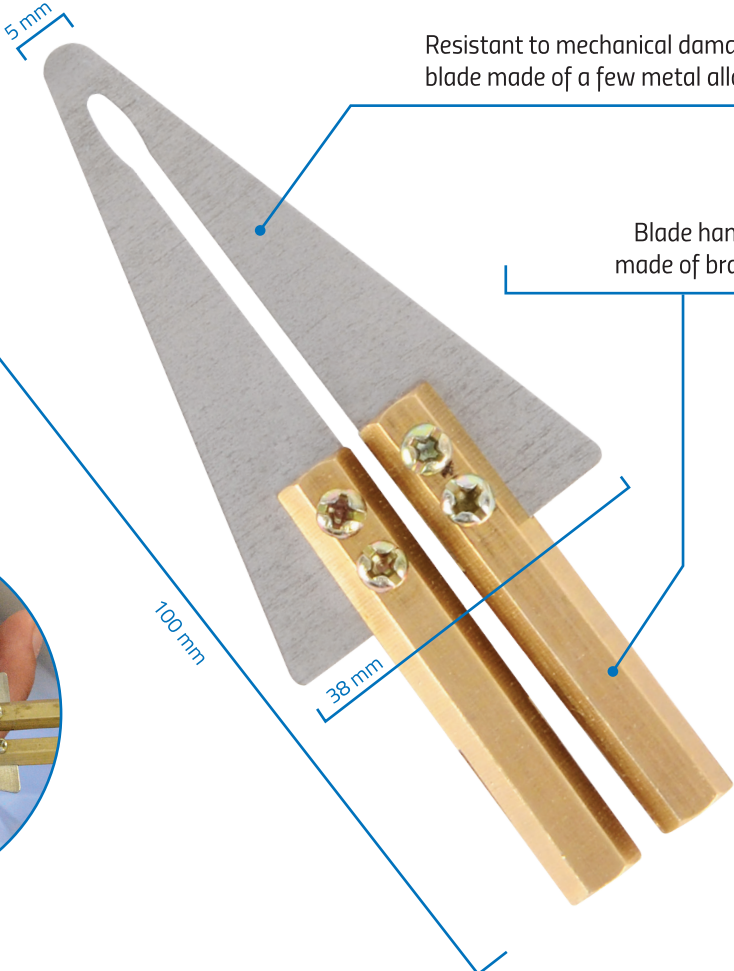

- DIMENSIONS:**
 Tip's length: 100 mm
 Blade length: 65 mm
 Blade width: 5 - 38 mm
 Blade thickness: 0.5 mm

Resistant to mechanical damage
blade made of a few metal alloys.
