

• **NTools Ekspander**
Fastening line with hooks

NTools Expander is a rubber line with hooks on both ends. The outer part is made from UV ray resistant polypropylene, while the core is comprised of high quality latex rubber (grey). Thanks to its properties it can be used equally successfully indoors as well as outdoors.

NTools Expander, contrary to its competition, is characterized by high flexibility and resistance to stretching. The lines are intended for fastening and securing various items.

Application:

- securing loads,
- fastening of objects,

Strong fittings

High quality latex rubber

Protection of sharp edges

Hook made from high quality tempered steel
