

• NTools PCH Set Set of 4 plastic tools

The NTools PCH Set is a set of 4 appliances made out of a polyamide reinforced with glass fiber (PAGF). The tools are characterized by high mechanical durability and rigidity. The tools may be used for work in heightened temperatures. The NTools PCH Set excellently complements the equipment of any car repair workshop. The tools have sharpened edges and, due to the material they are made of, are able to minimize the risk of scratching surfaces during use.

APPLICATION

- disassembly of soft vehicle interior elements made from plastic
- removal of dirt and contamination, e.g. resin from trees, glue residue, sticker residue, etc.
- removal of hot-melt glue during PDR repairs
- vulcanization
