

• **NTools G-STICK BLACK**
Universal hot melt glue

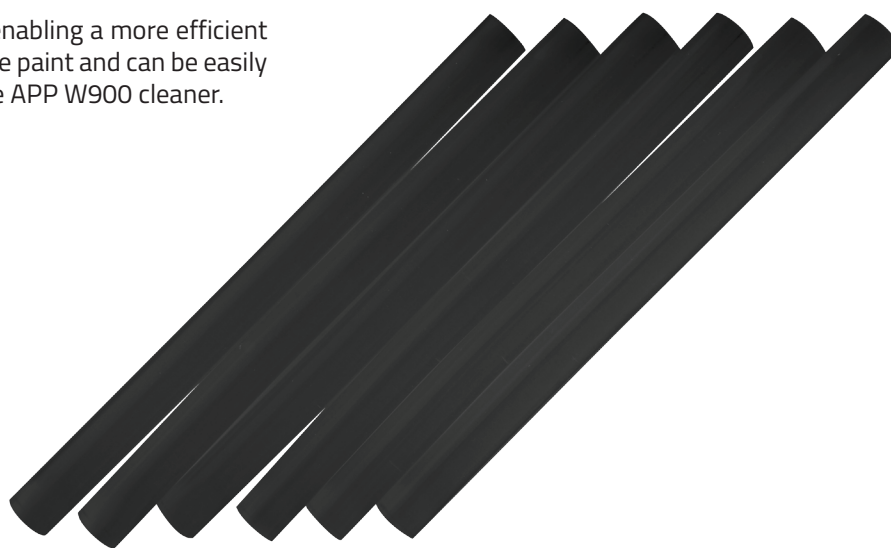

The universal hot melt glue in stick inserts is intended for applications in paint-less dent repair techniques using the adhesive method.

NTools G-STICK BLACK guarantees very good work comfort. Its increased density allows the user to safely go to the repair location. The glue adheres perfectly to the repaired surface, thus granting the possibility of more effectively pull out dents in the bodywork.

After congealing the glue remains flexible, enabling a more efficient repair process. The glue does not damage the paint and can be easily removed from the vehicles surface using the APP W900 cleaner.

GLUE PARAMETERS:

- length 190 mm,
- diameter 11,2 mm,
- temperature range 0-26°C,
- color: black.
