Suction pad with hanger for car body repairs

NTools UPW provides suction pad with hanger and pump purposed for car body repairs. Aluminium alloy body and strong rubber sucker ensure stable attachment to car body. Sucker design enables attachment to curved surfaces also. Tape length allows hanger height adjustment according to individual needs.

Hanger made from strong 100% Polyester hat offers tensile strength. Tape design prevents scratches of car body during works. The bottom part is provided with the cover that protects against soiling.

NOTE!
Before works related to repairs, firstly check that the surface is clean. For cleaning W900 stripper is recommended that provides degreasing of car body surface also.
