

• NTools TP12 Mallet Set for PDR Repairs

NTools TP12 is a practical and professional set for bulge elimination during paintless dent repairs.

NTools TP12 includes different type mallets required during repairs of car body damages. Mallets and tips made from PTFE offer improved mechanical strength whereas aluminium handles with milled body ensure comfort of work. Possibility to change quickly the tip makes for another advantage. Long absorbing spacers are perfect for repairs of bigger car body irregularities as they prevent signs of hammering against an extensive, smooth bulge.

NTools TP12 is a perfect tool for car body repairs with PDR system and indispensable one for PDR professionals.

Set includes:

- 1 Short handle: 90mm
- 2 Long handle: 130mm
