

• NTools ZPP 1224 Surge Protector

APP No. 353903

Surge protector has been designed to provide protection for car electronics during welding and plasma cutting of car body sheet metal. It protects ABS, computer, alarm system and user setting memory. This device eliminates small surge. In case of major short circuit it handles loading and at the same protects car electronics.

You can install the protector to battery terminals and therefore during car repairs you do not have to disconnect the battery.

Technical data:

- Triple protection
- 12V/24V
- Diode indicating connection
