

• **NTools AH 10/15/50**
Anti-static Air Hose 8x15

High quality anti-static hose made from two rubber coats: red and black one. Exterior red coat ensures resistance to abrasion, contamination and extreme operating conditions. Internal black coat is reinforced and ensures resistance to greases, oils and carries the air.

Polyester braid provided between coats ensures reinforcement whereas thin copper wires provide anti-static performance. Hose offers high flexibility and resistance to bending, stretching and kinking. Silicone free.

AVAILABLE LENGTHS:

- 1 **10m** - NTools AH 10 Antistatic air hose 8x15 with fittings (APP No.389033)
- 2 **15m** - NTools AH 15 Antistatic air hose 8x15 with fittings (APP No.389034)
- 3 **1m*** - NTools AH 50 Antistatic air hose 8x15 (APP No.389040)

* Other length available upon request.

PRODUCT NAME

| Product Name | NTools AH 10/15/50 |
|------------------------|--------------------|
| Length | 10 m / 15 m / 1 mb |
| Exterior diameter | 8 mm |
| Internal diameter | 15 mm |
| Max operating pressure | 20 bar |
| Safety factor | 4:1 |
| Operating temperature | From -40°C to 90°C |
| Colour | Red |

• **NTools AH 10/15/50**
Anti-static Air Hose 8x15

ADVANTAGES:

Anti-static performance- thin copper wires placed between coats ensure electrical load discharge – to enable use in paint booth.

Comfort- flexible, lightweight – ca. 20% lighter than traditional hoses, offers high flexibility in extreme working conditions from -40°C to 90°C.

Resistance- improved resistance to abrasion, mechanical damages and greases or oils.

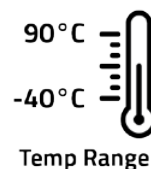

Heavy duty performance- also in extreme weather conditions – ozone coat protects against weather conditions, low and high temperature.

Ready to use *- fitted with **Rectus 26/DN 7.2** high quality brass fittings.
